

Press Release

SOLIDReporter for SOLIDWORKS – Time and Project Management Tool

3DEXPERIENCE World, Nashville, USA, February 9, 2020: Logopress, a long-time SOLIDWORKS® software partner, announces the launch of a new add-in product called SOLIDReporter™ which has been developed for all SOLIDWORKS users. SOLIDReporter™ is an easy-to-use and affordable add-in designed to work seamlessly within SOLIDWORKS to automatically record, monitor and manage time, tasks and projects.

SOLIDReporter will automatically record time spent working on parts, assemblies or drawings while automatically switching between projects based on criteria defined by the user. It also provides the flexibility of creating custom tasks to keep track of time spent while working outside of SOLIDWORKS, whether it is time spent in meetings, on breaks, in the shop, etc.

SOLIDReporter helps the user and the manager to monitor their projects in real time. It also allows the user and the manager to generate analytical reports by project, task, or time period. SOLIDReporter is designed to be forgotten, without forgetting what was worked on in SOLIDWORKS.

SOLIDReporter automatically stops allocating time to a project, based on a user defined period of inactivity in SOLIDWORKS. The user can also add notes such as reminders, ideas and questions to the currently active project in order to follow up on them later. In addition, a time budget can be set for each individual project. SOLIDReporter then monitors the amount of the budgeted time used providing alerts at project milestones.

Ray Proeber, president of Accurate Die Design Software, stated: "People are often pulled in many different directions and at the end of the day, they don't want to have to remember what they spent their time on and how long they spent on it. It is also typically only a guess and not an accurate accounting of their time. SOLIDReporter does away with this headache. In no time at all SOLIDReporter will become an indispensable time and project management tool for automatically recording time and generating reports in SOLIDWORKS."

SOLIDReporter is available for purchase today from www.SOLIDReporter.com. Volume purchases in the United States may be made through Logopress' North American distributor, Accurate Die Design Software, Inc., www.DieDesignSoftware.com.

About Logopress, an AutoForm Company

Since 1989, Logopress, headquartered in Besancon, France, has been primarily focused on the development of die design software for the tool & die and metal stamping industries, as well as related flattening software for various applications. Logopress is a world leader in die design software and their Logopress3 products have achieved SOLIDWORKS Certified Gold Partner status. For more information about Logopress3 products, visit the company's website: www.logopress3.com

The company also develops SOLIDReporter products for all SOLIDWORKS users in all industries, including SOLIDReporter SOLO and SOLIDReporter TEAM REPORT. For more information about SOLIDReporter, please visit the product's website: www.SOLIDReporter.com

SOLIDReporter™ is a trademark of AutoForm Engineering GmbH.

SOLIDWORKS® is a registered trademark of Dassault Systèmes SOLIDWORKS Corp.

About AutoForm Engineering GmbH

AutoForm offers software solutions for the die-making and sheet metal forming industries along the entire process chain. With over 400 employees dedicated to this field, AutoForm is recognized as the leading provider of software for product manufacturability, tool and material cost calculation, die face design and virtual process optimization. All of the Top 20 automotive OEMs and most of their suppliers have selected AutoForm as their software of choice. Besides its headquarters in Switzerland, AutoForm has offices in Germany, The Netherlands, France, Spain, Italy, Czech Republic, Sweden, USA, Mexico, Brazil, India, China, Japan and Korea. AutoForm is also present through its agents in more than 13 other countries. For detailed information please visit: www.autoform.com

About Accurate Die Design Software, Inc.

Since 2004, Accurate Die Design Software, Inc. has been the North American distributor for Logopress3, a 3D die design software product that runs inside of SOLIDWORKS. The company's primary focus is providing 3D die design software, training and support to companies in the tool & die and metal stamping industries as well as flattening and forming simulation software. In 2020, Accurate Die Design Software became Logopress' North American distributor for SOLIDReporter. For more information visit the company's website: www.DieDesignSoftware.com
